If you have ever struggled to generate multi-company/multi-currency consolidated financial reports, Synoptix makes burdensome consolidations a thing of the past—even companies with different charts of accounts. The application even handles intercompany eliminations.

Pulling in data from multiple companies is incredibly easy, as is data in spreadsheets. You can even create a consolidated financials spreadsheet experience, but eliminates completely the common pitfalls that spreadsheets inherently create with its direct connection to your database.

Synoptix allows you to drill down to source document information on any summary data field with just a click of your mouse; no special programming required. Imagine the power of being able to analyze any number you see on a report just by clicking on it.

Synoptix comes already integrated to your ERP database. You can immediately begin creating reports within minutes, without a detailed knowledge of your database layout. Standard report templates reduce the time it takes to create custom reports tailored to your specific information needs.

Synoptix allows you to create dashboards with graphs, charts, gauges, and reports using simple point and click procedures. Group a series of reports together in a single packet that puts all your critical performance indicators at your fingertips.

Synoptix will revolutionize how quickly you can view critical business metrics with its built-in ad hoc reporting capabilities. Build reports with drag and drop procedures for fast analysis with team members using a detailed view of your data, or rich it out with a more visual look and feel. Bottom line is that Interactive Reporter will be perfect for users who want to get in and see data quickly without having to use SQL query tools that require a broad range of technical expertise.

Just another way that Synoptix is empowering companies with an important competing edge in an ever-changing corporate environment.

View your key performance indicators

You can create dashboards with graphs, charts, gauges, and reports using simple point and click procedures. Group a series of reports together in a single packet that puts all your critical performance indicators at your fingertips.

Schedule reports to run & be distributed automatically

Eliminate the hassle of report distribution to team members with Synoptix’s scheduling server. The server automatically runs reports on pre-determined schedules and then publishes them in html, pdf, or spreadsheet formats. Once published, Synoptix can automatically email reports to team members or point them to your intranet, internet, or other distribution products.

Synoptix allows you to drill down to source document information on any summary data field with just a click of your mouse; no special programming required. Imagine the power of being able to analyze any number you see on a report just by clicking on it.

Familiar report environment

Synoptix has the look and feel of a standard spreadsheet to take advantage of users’ spreadsheet experience, but eliminates completely the common pitfalls that spreadsheets inherently create with its direct connection to your database.

Combine data from multiple data sources in one report

Pulling in data from multiple companies is incredibly easy, as is data in spreadsheets. You can even create a consolidated financials spreadsheet with data from another ERP system. In addition, Synoptix allows you to pull in data from multiple areas within your database and have it displayed on a single report, eliminating the need to create multiple reports and then combine the results in a spreadsheet.

Easy-to-use date functionality

Ever try to create a report that shows Year-to-Date, Month-to-Date, and Quarter-to-Date on the same page? How about previous three months or a rolling twelve months? With Synoptix, defining any of these date functions is a single click on a pull-down list. What previously took a programmer several hours now takes a standard user less than a minute to create.

Painless consolidations, eliminations, and multi-currency conversions

If you have ever struggled to generate multi-company/multi-currency consolidated financial reports, Synoptix makes burdensome consolidations a thing of the past—even companies with different charts of accounts. The application even handles intercompany eliminations.

Interactive reporting

Synoptix will revolutionize how quickly you can view critical business metrics with its built-in ad hoc reporting capabilities. Build reports with drag and drop procedures for fast analysis with team members using a detailed view of your data, or rich it out with a more visual look and feel. Bottom line is that Interactive Reporter will be perfect for users who want to get in and see data quickly without having to use SQL query tools that require a broad range of technical expertise.

Just another way that Synoptix is empowering companies with an important competing edge in an ever-changing corporate environment.

Comprehensive tutorials and continuing education opportunities

Designed with ease of use in mind, Synoptix ships with extensive documentation on reporting best practices. The Tutorial icon on the home screen delivers step-by-step instructions on how to create many different types of Synoptix reports, and because it’s a live feed, your tutorials will be continually updated and notify you automatically when a new one becomes available. The home screen’s RSS icon will also provide you with announcements of other educational opportunities, including the free monthly continuing education courses.

Synoptix is the industry leading solution for enterprise report writing and drill down analysis, providing quick access to the necessary data you need to make critical business decisions.

It empowers you to answer the all-important questions. How are we doing? Why are we on or off track? What is the best course of action?

Good decisions generate other good decisions, so having answers to these vital questions is essential for your company’s long term health.
